

DIVISION

Divide and conquer!

Get rid of all the cards from your hand first by finding cards that divide into each other without any remainder.

HOW TO PLAY:

First prepare the deck of cards. Remove all face cards (Jack, Queen, King) and jokers. Ace has the value of one, while other cards have the value of the number shown on the card. Once the deck is ready you are ready to start the game.

1. Each player gets four cards. The rest of the deck is placed in the middle as the draw pile. Players can look at their cards while they wait for their turn.
2. The first player takes the top card from the draw pile and looks at it. If you have a pair of cards that divide into each other read them out e.g. 10 divide by 5 is equal to 2 and place that pair into the discard pile. That way you will be down to 3 cards in your hand only.
3. Think ahead, so if for instance you have an ace and you can save it for another turn do so, since any number is divisible by 1 so the ace can be considered as a wild card / joker in this game.
4. The game continues until someone is able to divide and discard all of his/her cards.
5. Remember that you always have to draw a card at the start of each new turn.
